

Conserve™ On-Farm

Grower Return Process

GRAIN PROTECTOR

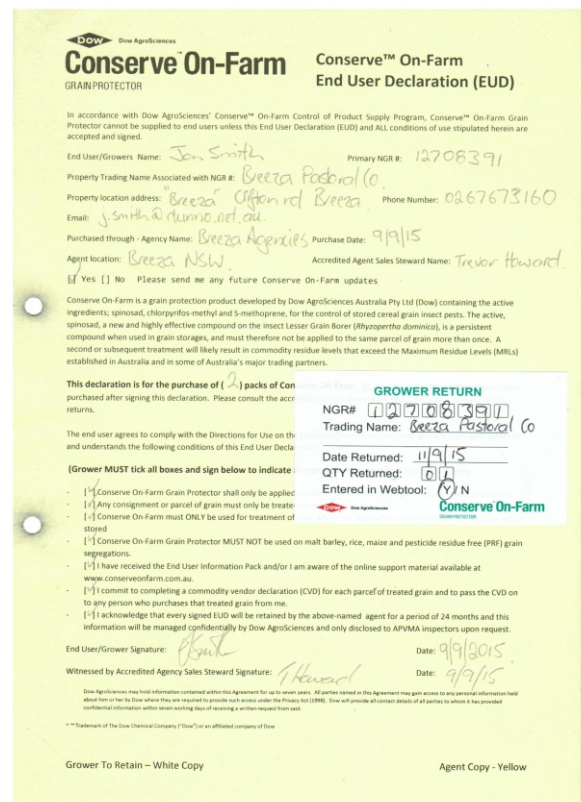

The grower return process provides audit traceability and formalises the return of Conserve On-Farm on the End-User Declaration (EUD).

Growers must return Conserve On-Farm to the original place of purchase. Accredited stewards will inspect the carton to ensure

- Both Part A & Part B are in the carton
- Bottle tamper seals are intact
- There is no damage to the cartons
- It is still fit for resale.

Step 1 - EUD Process

- Locate the growers' yellow EUD in the Conserve On-Farm EUD file
- Stick the return sticker on the EUD
- Fill in the grower details on the sticker
- File EUD with return sticker into the original month of sale.

Step 2 - Webtool Process

Add a new entry with the growers same details and tick the **“GROWER RETURNING PRODUCT”** box. This will then put the entry into the grower return column and increase your stock on hand (SOH). Your physical SOH must match the webtool SOH.

The data entered on the webtool must match the original EUD. Circle the sticker on the EUD as entered, once the data has been inserted onto the webtool.

- #### Top Tips
- You can only work on entries in the current month (you can't edit or add to previous months)
 - You can delete an entry completely
 - You can edit the details in the entry
 - You can add as many entries as you need in the current month
